ALBIAN SANDS ENERGY CONTRIBUTES TO BOYS & GIRLS CLUB  
A donation to the Project Kids Campaign will support  
the expansion and enhancement of the club.

FORT MCMURRAY – Albian Sands Energy announced today that they are contributing to the expansion of the Boys & Girls Club with a \$50,000 donation. The expansion will add 10,000 square feet to the facility and consist of a new large gymnasium with a mezzanine, craft rooms and other areas for youth programming.

“The Boys & Girls Club is an essential part of our community that is desperately in need of more space,” says Allen Barber Vice President of Issues Management and External Affairs at Albian Sands. “We visited the club and saw many children having a great time at the summer camp. Albian is proud to be a part of this project.”

Skip Rodrigues, Executive Director of the Boys & Girls Club, shares his thoughts on this recent donation, “We are very happy Albian Sands committed to supporting the Project Kids expansion. This is a community project and with support from industry, government, local business and the public we will soon be able to offer our services to many more Fort McMurray children and youth.”

The Boys & Girls Club is a volunteer organization that depends on donations in order to provide the necessary facilities and programs needed by the Fort McMurray community. In total \$850,000 is needed for the expansion project but they will be able to commence construction once they reach the \$700,000 mark.
